1. DESCRIPTION

The bedside panel is dedicated to hotels. It has a thermostat function which can be used on heating and/or air conditioning installations, 5 scenario control units and a "Do not disturb" housekeeping function. It is possible to display and set the reference temperature, fan speed, and switch ON with thermal overload protection.

The screen displays the measured ambient temperature or the reference temperature.

It indicates and can be used to activate the housekeeping information:

- Do Not Disturb
- Make up room: only available on configured version.

It has a proximity sensor which can be disabled by configuration: when the device detects an approach, it switches from standby state to active state. The LED brightness level (on standby or active) and the time delay before returning to standby state can also be set by configuration.

The control & management software is used to view and control the thermostat. Configuration is possible with the MyHotel_Suite software on SCS installations which include the MH201 device, or with the Hotel Room Controller Software on IP installations which include the 0 484 08 or 0 484 12 device.

2. TECHNICAL CHARACTERISTICS

BUS/SCS power supply:	18 - 27 VDC
Consumption with screen off:	8 mA
Consumption with ultra-bright screen:	30 mA
Operating temperature:	0°C to +40°C
Storage temperature:	-20°C to +70°C
Unit of measurement:	°C or °F
Loads controllable by an actuator:	On/Off Open/closed Fan coil unit with 2 tubes and On/Off valve IP gateway (centralised HVAC package) Fan coil unit with 2 tubes and proportional valve Fan coil unit with 4 tubes and On/Off valve Fan coil unit with 4 tubes and proportional valve Proportional valve Fan coil unit with 2 tubes and proportional speed control Fan coil unit with 4 tubes and proportional speed control
Protection index:	IP 20, IK 04
Plate and surround colour (standard):	Black Cat. No. 0 487 72/FL4653 or White Cat. No. FL4653W

- Key**
- | | |
|--|--|
| 1. Scenario buttons | 5. + button: increases the reference value |
| 2. Heating enabled indicator (red)
Air conditioning enabled indicator (blue) | 6. - button: decreases the reference value |
| 3. MODE button: pressing briefly changes from normal mode (ON) to protection mode (frost guard or thermal overload).
A longer press changes the function (heating/air conditioning/automatic) according to the configuration. | 7. FAN button: sets the fan speed (3 levels + automatic) |
| 4. Measured temperature (SET off) or reference temperature (SET on) indicator | 8. Fan speed indicator (3 levels) + automatic |
| | 9. DND indicator (red LED on: DO NOT DISTURB) |
| | 10. Local contact |
| | 11. Connection to the BUS |

DEFAULT VALUES		
	Heating	Air conditioning
Setting interval	3-40°C	3-40°C
Comfort	21°C	25°C
Economy	18°C	28°C
Frost guard	7°C	
Thermal overload		35°C
